DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on December 21, 2004 was in compliance with the provisions of 37 CFR 1.97 and 37 CFR 1.98. The IDS document was considered. A signed copy of form 1449 is enclosed herewith.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a), which forms the basis for all obviousness rejections, set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S Patent No. 3,976,616.

The present invention is directed to a vinyl chloride resin composition that comprises as the major plasticizer a neopentyl glycol bis(diphenyl phosphate) composition.

Determination of the scope and content of the prior art (MPEP §2141.01)

US PATENT No. 3,976,616 teach bis phosphate plasticizers for thermoplastic polymers, especially for polyvinylchloride.

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The only difference between the composition of U.S. Pat. No. 3,976,616, and the claimed composition is that applicants are claiming specific amount of phosphate in the composition.

Finding of prima facie obviousness--rational and motivation (MPEP §2142-2413)

However, the Courts have decided per In re Boesch, 205 USPQ 215 (1980), of variables, such as molar ratios, in a known composition prima facie obvious. Therefore, the claimed composition would have been suggested to one skilled in the art. Since both compositions are used for the same purpose.
